

## **Victoria House Care Centre**

**Victoria House Care Centre** provides a range of facilities to meet individual needs including residential care, long and short term nursing care, respite care, physical disability support and functional mental health needs. Care packages can be devised for those with additional support needs and costs are provided on request. Each Unit within Victoria House Care Centre is individual and staffed separately to promote consistency. Each unit has their own lounge and dining rooms and bedrooms are spacious with some en-suite. Victoria House Care Centre has an Activity Hub with daily recreational and social events. There is also a Chapel and regular services are provided by a local Chaplain. Victoria House Care Centre has a range of multifunctional rooms for meetings and events including private parties. The home overlooks mature gardens to most aspects.

**Osborne Suite** has 22 bedrooms providing nursing care to the elderly mentally ill (EMI) of both sexes. We aim to promote a holistic approach to care for residents devised through person centred planning and shared decision making and includes family members and carers in this process. Our skilled team will support service users to meet their needs through evidence based approaches. Our residents can expect to receive support in all activities of daily living and both individual and group therapeutic interventions. Our staff consists of Registered Nurses, Senior Carers and Carers providing 24-hour care and treatment to the service users whilst preserving dignity and respect in a safe environment.

**Kensington Suite** is divided into two Units. The first is an 11 bedded unit providing nursing care for elderly, mixed sex, residents suffering from high dependency dementia. It offers a calm environment in which to provide a holistic approach to care and supports residents to meet their needs. Staffing consists of Registered Nurses working alongside Senior Carers and Carers to deliver high quality care to the service users. The second unit is also mixed sex and has 7 beds which provide residential care and support to allow individuals to meet their daily living needs in a comfortable and safe environment.

**Regent House** is currently divided into two units. The first unit provides residential care for both sexes. This facility offers 7 bedrooms along with a separate lounge and dining room. The unit provides the highest quality of care, comfort and support with friendly, experienced staff in a warm, homely environment. The care staff are experienced and skilled in delivering care and support for this client group. The environment is decorated in a manner that is calming, well signposted and based on a neutral colour scheme that reflects a peaceful environment.

The second unit is 10 bedded and provides care, support and rehabilitation to males who have functional mental health issues. The Registered Nurses and Healthcare Assistants have experience in this field of nursing. They are trained to be multi-skilled and knowledgeable in providing evidence based care to this group of service users. The aim is to promote individual rehabilitation with individual care packages designed to maintain their optimum level of wellbeing.

**Balmoral Suite** is a 10 bedded, mixed sex, physical disability unit which has been specially adapted to strike a balance between providing support when needed and helping residents maintain their independence. Our care team encourage each resident to lead a full, active lifestyle where possible and assist with interventions when required. We provide a positive environment with an aim of promoting independence whilst enhancing the individuals' quality of life.
